Predicted Energy Assessment (PEA)

The energy performance has been assessed using the Government approved SAP 10 methodology and is rated in terms of the energy use per square meter of floor area; the energy efficiency is based on fuel costs and the environmental impact is based on carbon dioxide (CO₂) emissions.

Energy Efficiency Rating

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

Environmental Impact (CO₂) Rating

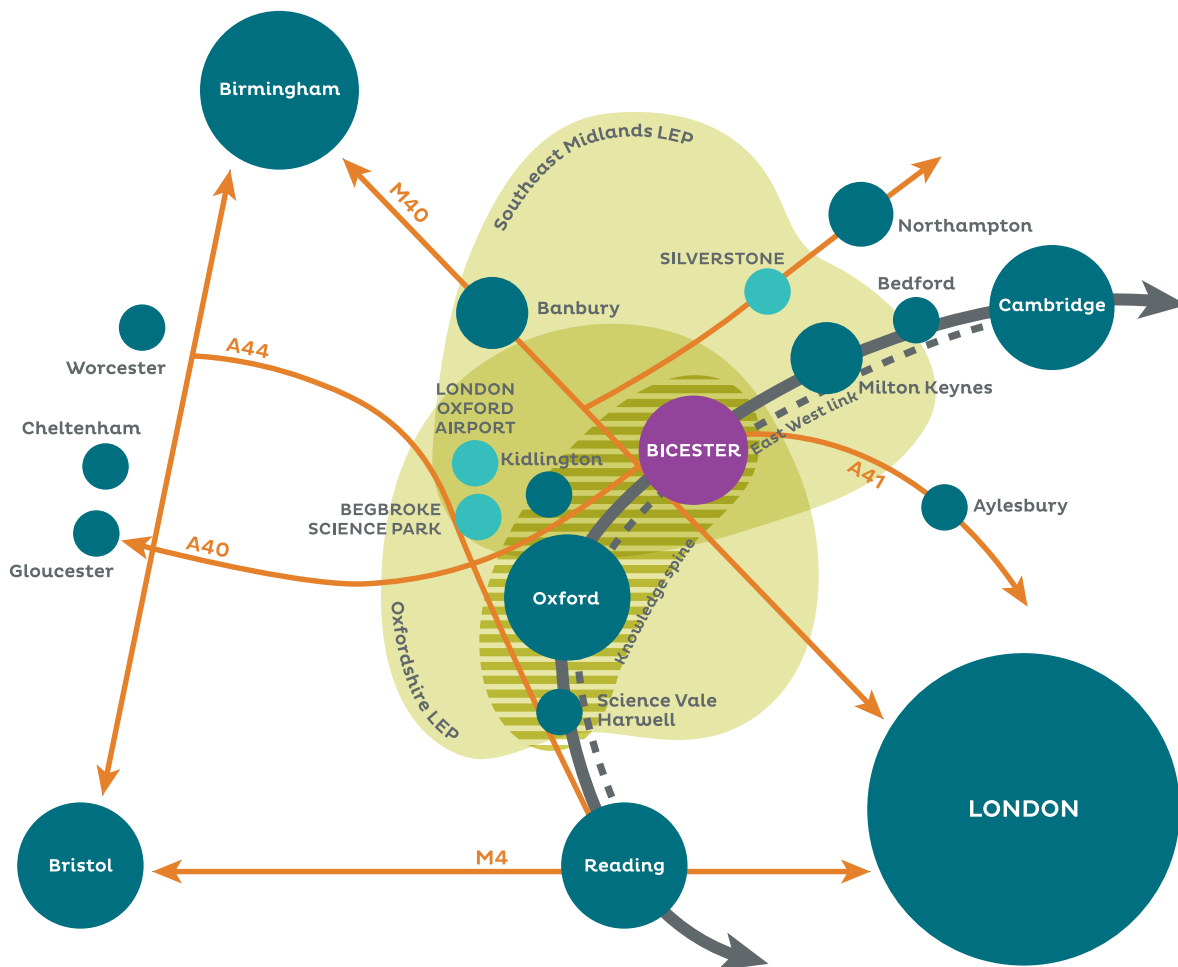

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment

Our Commitment to Quality & Standards: Graven Hill Village Development Company Ltd is on the New Homes Quality Board register of registered developers. All homes are constructed to meet the latest Building Regulations, and will comply with, as a minimum standard, the latest NHBC Technical Standards or equivalent benchmark. Each property is built to achieve an EPC rating B under current energy efficiency standards. We are dedicated to providing an inclusive and supportive service, especially for customers in vulnerable circumstances. Our goal is to ensure that all our communications and services are accessible, transparent, and helpful throughout every step of the home-buying journey.
